SQL Injection Attacker IP: 192.168.1.105

Target URL: /login.php?user=admin'

SOC Analyst Insight (AI)

Brute Force Attack Attacker IP: 192.168.1.105

Target URL: /login.php

SOC Analyst Insight (AI)

Command Injection Attacker IP: 192.168.1.88

Target URL: /ping.php?ip=127.0.0.1;whoami

SOC Analyst Insight (AI)

- **Severity & Impact**: High – the attacker can execute arbitrary commands on the web server, potentially compromising the entire host, exfiltrating data, or pivoting to internal networks.
- **MITRE ATT&CK Mapping**: T1059.003 – Command and Scripting Interpreter: Unix Shell (Command Injection).
- **Mitigation Action**: Immediately block the source IP (192.168.1.88), isolate the affected web server, and patch the vulnerable script; conduct a forensic review of command logs and audit all input validation on web applications.
